

1811. This is Volume IV of VI of Taylors translation of the Works of Aristotle. Thomas Taylor was one of the outstanding translators of the philosophical writings of the Greeks and Romans, and also published several original works on philosophy and mathematics. Many of his important contributions in these fields have been long out-of-print and are extremely difficult to obtain, having been issued in very small editions. Most of Taylors translations have an archaic elegance which preserves the spirit of the older authors in a manner not evident in more recent translations. Taylor also added notes and commentaries which give valuable insight into the essential meaning often obscure in the actual text.
