

Learning about food chains and the interdependence of living things is an important part of the early science curriculum. This series uses simple text, full-color photographs, and a food chain diagram in each book to introduce these concepts. The high-interest subject matter will capture young readers' attention. The text, which has been vetted by both a science curriculum consultant and a reading consultant, will build students' reading skills as they discover how plants and animals depend on each other for survival.
